## Plastic Dispense Tip Sample Kit

### Dispense Tip Sample Kit

This kit has 2 cases; the larger case has 2 empty 5cc syringes, 2 empty 10cc syringes, 2 empty 30cc syringes, all with thumb plungers ready for fluid loading, and a smaller case. There is a lot of space to store additional dispense tips, plus the unused dividers to reconfigure the case. This case is ideal for storage in a drawer, or workbench.

The smaller case has 12 types of dispense tips, with 5 of each type. The case fits in most pockets and has a hand strap for carrying it with you.

This kit is designed as an evaluation kit – It allows the user to try a number of dispense tips and then order a larger quantity of only what is suitable for the user's specific application.
